Development
Maine Medical Center
22 Bramhall St, MGB2, Rm 2644
Portland, ME 04102-3175

Overview:

This program is designed for perioperative nurses and other healthcare professionals to advance their knowledge and understanding of best practices that impact patient care in the perioperative setting.

Learning Outcomes:

As a result of participating in this educational activity, the learner will identify strategies to include in their clinical practice and enhance care of perioperative patients.

Objectives:

- Discuss indications for Transcatheter Aortic Valve Replacement (TAVR)
- Review TAVR procedure and post-op care
- Review rationale for pre-op stoma marking
- Review peri-op pressure injury prevention strategies
- Discuss common wound care treatments including various negative pressure wound therapy options
- Analyze human factors in patient safety
- Summarize case report from a fire in the OR
- Review the basic fire triad and identify fire risks in the operating room environment
- Identify indications for trans-oral robotic surgery (TORS)
- Describe basic principles of room setup and instrumentation for TORS
- List key considerations for patient safety during TORS cases
